Data Engineering | Uptime & Reliability Automation | OCI Analytics | Governed GenAI Workflows

PROFESSIONAL SUMMARY

Data engineer specializing in production analytics automation, cloud-delivered operational intelligence, and governed GenAI workflows at Oracle. Builds Python/SQL pipelines, reconciliation controls, and secure OCI analytics applications that turn Jira, service telemetry, Event Assessment, Slack, and Confluence evidence into trusted uptime reporting and source-backed incident artifacts.

EDUCATION

MS in Computer Information Systems, Data Science concentration - University of Houston Clear Lake, January 2025

Bachelor of Business in Management Information Systems - Texas Southern University, December 2018

PROFESSIONAL EXPERIENCE

Oracle - Senior NES - Global Improvement Engineer (GI) | January 2021 - Present | Austin, TX

- Re-architected monthly NetSuite CSI uptime reporting from a spreadsheet/macro-driven process into a Python-owned CLI/GUI platform, shortening the end-to-end reporting cycle from 3-5 days to about 3 hours.
- Built runtime-configured Python/SQL pipelines that automate read-only Hub Event Assessment and Jira acquisition, service-availability calculations, and Excel-compatible workbooks plus historical CSV/JSON reporting datasets.
- Deployed a secure OCI analytics proof of concept on Autonomous Database Serverless and Oracle APEX, with a run-triggered python-oracledb feed, immutable snapshots/current views, mTLS wallet authentication, Keychain-backed secrets, and operator pages for uptime, MOR readiness, gap drill-down, and refresh history.
- Implemented canonical Hub-first CIM reconciliation, active/inactive audits, legacy DTR edge checks, and publication-readiness gates that separate true blockers from review items and contextual differences before executive reporting.
- Established data-quality controls across five source systems and own monthly NetSuite Hub integration with 100% on-time delivery for service reporting and customer-impact analysis.
- Evolved Custom GPT prototypes into reusable Codex skills and connector-enabled workflows that assemble verified Slack, Jira, Confluence, and internal-system evidence for postmortems, executive summaries, ticket-quality review, and event-management triage.
- Designed source-grounded, human-in-the-loop review flows with explicit approval gates and controlled Confluence handoff for high-impact incident outputs and GenAI model-lifecycle tracking.
- Support AMER Large Scale Events and Cloud Event Response through Python automation, SQL analysis, OCI/Oracle Analytics, Jira analytics, and Agile delivery.

Lockheed Martin - Government Financial Data Analyst | May 2019 - January 2021 | Marietta, GA

- Led analytics initiatives for Aeronautics Sustainment Operations, using business intelligence and visualization tools to improve financial and operational decision support.
- Delivered BI training that modernized financial-system workflows and improved team adoption of reporting tools.
- Drove process integration and cross-functional improvements supporting DCS, USG, and FMS customer operations.

BAE Systems, Inc. - Business Systems Analyst | June 2018 - December 2018 | Austin, TX

- Performed security and vulnerability assessments across 200+ systems, supporting DFARS compliance initiatives and risk visibility.
- Automated onboarding and hardware-distribution reporting by consolidating data sources into more repeatable reporting workflows.

PROJECTS

Uptime Intelligence & MOR Readiness Platform: Built a Python-owned monthly reporting platform and secure OCI/APEX proof of concept that combines canonical Hub Event Assessments, Jira comparison data, preemptive uptime, CIM reconciliation, publication gates, Top 5 event views, gap drill-down, and immutable run history.

CSI Evidence Automation: Evolved PostmortemGPT and Executive Summary Builder prototypes into reusable Codex skills and connector-enabled workflows for source-backed postmortems, executive summaries, incident communications, human review, and approved Confluence handoff.

OCI/NetSuite GenAI Model Lifecycle Tracking: Designed a workflow for deprecation-notice intake, model-availability monitoring, impacted-consumer discovery, replacement-model visibility, and governance follow-up.

SKILLS

Data Engineering: Python, SQL, Pandas, PySpark, OpenPyXL, python-oracledb, CLI/GUI tooling, ETL/ELT, runtime configuration, data-quality validation, reconciliation, immutable snapshots, current views, and CSV/JSON/XLSX generation.

OCI & Data Platform: Oracle Cloud Infrastructure, Autonomous Database Serverless, Oracle APEX, mTLS wallet authentication, OCI Data Flow, OCI Data Science, OCI Generative AI, Oracle Analytics Cloud, NetSuite, Supabase, and Google BigQuery.

Agentic AI & Automation: Custom GPT-to-Codex workflow evolution, reusable skill design, plugin/connector orchestration, MCP, source provenance, human-in-the-loop approval, LLM implementation, RAG concepts, and model-lifecycle tracking.

Enterprise Workflow Systems: Jira, Confluence, Slack, enterprise connectors, NetSuite Hub, Event Assessment data, Oracle APEX, and Oracle Analytics.

Reporting & BI: Uptime and reliability reporting, service-availability analysis, customer-impact visibility, CIM reconciliation, MOR readiness and gap analysis, Power BI, Tableau, and Excel/XLSX automation.

Delivery: Agile, Scrum, technical program delivery, incident response, RCA support, Cloud Service Improvement.

CERTIFICATIONS

Oracle Cloud Infrastructure Data Science Professional - 2026; Oracle Cloud Infrastructure Generative AI Professional - 2025; Oracle Cloud Infrastructure AI Foundations Associate - 2025; Oracle Cloud Data Management Foundations Associate - 2024; Oracle Cloud Foundations Associate - 2024; Professional Scrum Product Owner II - 2023; Professional Scrum Product Owner I - 2023; Professional Scrum Master II - 2023; Professional Scrum Master I - 2023; EXIN Artificial Intelligence Essentials - 2023; EXIN Cloud Computing Foundations - 2022; IT Information Library Foundations - 2022

AWARDS AND LEADERSHIP

Lockheed Martin NextGen Award - Reshaping Our Financial Operations, 2020; Lockheed Martin NextGen Award - Evolving Our Culture, 2019; Lockheed Martin Leadership Association - VP of Programs; NSBE - President/Chair, Lockheed Martin Marietta Enterprise
